## Future Forgeworks appoints Advisory Board, building the foundations for future operational excellence.

Future Forgeworks announced today the appointment of its Advisory Board, formed to champion the world-class execution of the Swanbank Steel Mill and its future operations.

The following industry leaders were chosen for their wealth of experience across project delivery, capital and finance, and risk management. Meet the Advisory Board:

### **Leanne Bond (Chairperson)**

Leanne is an accomplished executive and board director of 30+ years with an impressive portfolio encompassing engineering and project delivery (Aurecon, Worley, Downer), renewable energy (Tilt Renewables, FPR Energy, Snowy Hydro), and green finance (Clean Energy Finance Corporation). Leanne brings the sophisticated stewardship required to execute the project, from capital investment and design through to delivery and operational excellence.

### **Grant Bush**

Grant's expertise in leadership and strategic thinking is a result of his extensive experience across investment banking, government finance and investment in early-stage companies and business expansion. His 30+ years in leadership brings a depth of knowledge in financing solutions, balance sheet management, domestic and international capital markets, and compliance. Grant most recently held senior executive roles at Queensland Treasury Corporation and Deutsche Bank.

### **Philip Noble**

A respected executive in international banking and finance, Philip brings more than 35 years' executive and board experience acquired across QIC, Queensland Treasury Corporation, Credit Suisse and Deutsche Bank. Philip's expertise in risk management, debt capital markets and government relations will be fundamental to our financial resilience.

“

*I'm excited to grow and shape Queensland's circular steel economy, bringing world class technology to recycle scrap metal into rebar for our thriving construction industry. Backed by robust delivery, capital and risk capabilities, our inaugural board of directors will complement a skilled executive team who have already built valuable stakeholder relationships.*

**- Leanne Bond**
